# 1. A UNIFIED MODEL OF INSPECTION

---

## A new inspection model

---

The High Inspector of Justice (HIJ) started its work on 1 February 2020, as a new independent constitutional institution. The High Inspector of Justice is the state authority responsible for verifying complaints, investigating violations and initiating disciplinary proceedings against judges and prosecutors of all levels, members of the High Judicial Council, members of the High Prosecutorial Council and the Prosecutor General (Article 147/d of the Constitution of Albania). The High Inspector of Justice is also responsible for the institutional inspection of courts and prosecution offices.

Until July 2016, the checking of magistrates was carried out by three separate institutions: the Minister of Justice, the High Council of Justice (for judges) and the Prosecutor General (for prosecutors). In July 2016, Albania undertook a profound reform of the justice system by establishing a new architecture of justice institutions. As part of this reform, the judicial inspection has been reorganized into a monocratic institution, which is the High Inspector of Justice.

---

## Election

---

The High Inspector of Justice is elected by at least 3/5 of the 140 members of the Assembly, for a period of 9 years, without the right to re-election. HIJ is selected from among prominent jurists of high moral and professional integrity and with no less than 15 years of professional experience, by the Judicial Appointments Council, according to a transparent and public procedure. The High Inspector of Justice has the status of a judge of the Supreme Court. Mr. Artur Metani is the High Inspector of Justice, elected on 20 January 2020 with 98 votes in favour, by the Assembly of Albania.

---

## Independence

---

The High Inspector of Justice is the head of the institution and exercises his functions in complete independence. Direct or indirect interference in the functions of the Inspector for carrying out verifications of complaints, investigations and inspections, or in relation to any specific subject brings responsibility according to the law.

---

## With the Assembly

---

The High Inspector of Justice is a legal entity with an independent budget, part of the state budget, which is approved by the Assembly. The organization, structure and number of employees of the HIJ office are approved by the Assembly, upon proposal of the High Inspector of Justice.

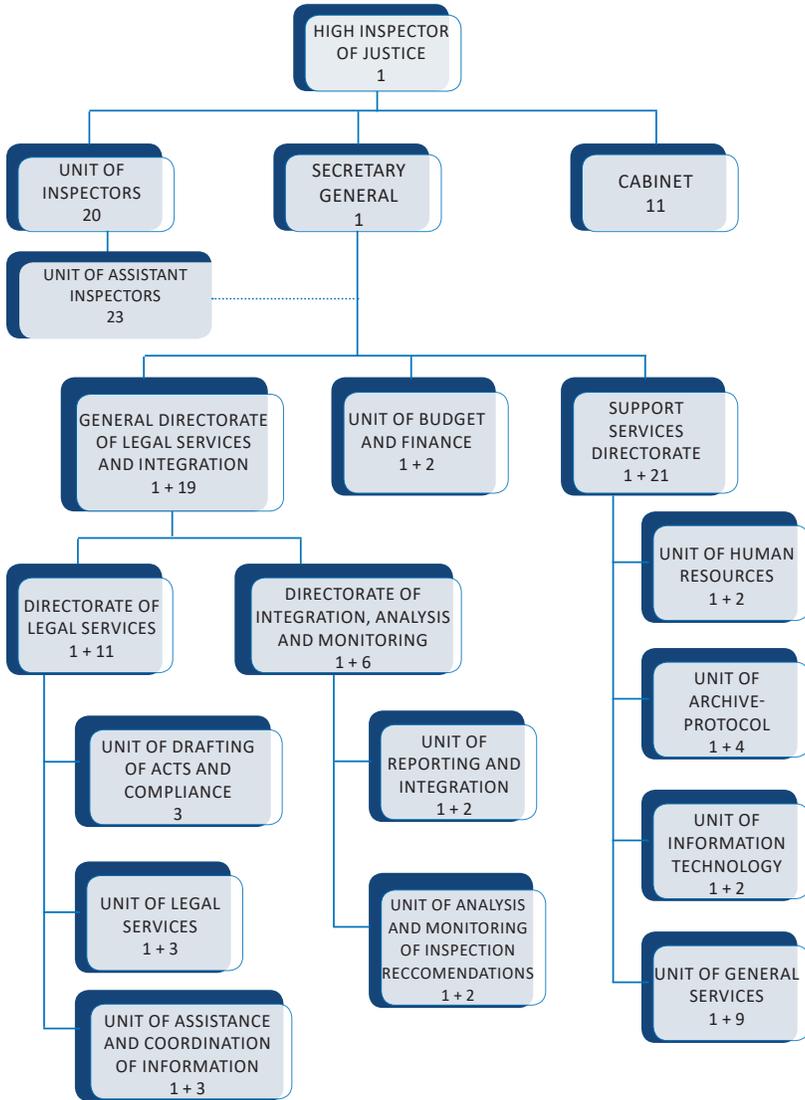

## 2. ORGANIZATION

The Office of the High Inspector of Justice (HIJ) is designed as an independent constitutional institution, organized and functioning as a legal entity with a separate budget financed from the State budget, and from other financial sources provided for by law, with a structure and professional personnel necessary for the exercise of constitutional and legal powers.

In fulfilling its constitutional and legal activity, the High Inspector of Justice has the following organizational structure:

- **The Cabinet of the High Inspector of Justice**, which activity, in addition to the tasks set out in the internal regulation, serves to consult and follow up on specific issues and tasks, assigned case by case by the High Inspector of Justice.

- **The Unit of Assistant Inspectors**, consists of jurists with 10 years of experience, who assist the unit of inspectors in the pre-investigation and post-disciplinary phase.
- **The General Directorate of Legal Services and Integration includes two directorates:**

- **Directorate of Integration, Analysis and Monitoring**, which includes the *Unit of Reporting and Integration* and the *Unit for Analysis and Monitoring of Inspection Recommendations*. This directorate prepares reports, strategic documents and any other document, requests data on the general activity for the commitments made within the framework of the European integration process; processes and analyzes statistical data on the activity of the HIJ for use by the institution, but also with the aim of increasing the transparency of the work of the Office of the High Inspector of Justice.
- **Directorate of Legal Services**, includes the *Unit of Drafting of Acts and Compliance*, the *Legal Services Unit* and the *Unit of Assistance and Information Coordination*. This directorate deals with drafting and verifying internal acts and documentation, provides legal opinions, conducts analysis and research, monitors assistance to citizens, the progress of complaints and requests for information, as well as every dimension of the institution's public relations.
- **The Unit of Budget and Finance** is committed to the most efficient, effective and economical use of public financial resources, respecting the principles of transparency and legality.
- **The Support Services Directorate** The Support Services Directorate includes the *Human Resources Unit*, the *Information Technology Unit*, the *Archive- Protocol Unit*, and the *General Services Unit*, with support functions for the institution.

## 5. WORK PHILOSOPHY

### ■ Standards:

Increasing public trust in the justice system in Albania remains a challenge for every justice institution, including the High Inspector of Justice (HIJ). This is why setting standards and aligning them with international standards for disciplinary investigation and inspection is the main goal of the High Inspector of Justice. Disciplinary proceedings of magistrates are considered not simply “punishment” for them, but fair, impartial standards, which aim at the accountability and responsibility of the justice system, which should be seen and followed by all magistrates in the justice system. In the HIJ’s view, justice should not only be established, but should also be seen to be done.

As an independent constitutional body, the HIJ has the opportunity to establish new working standards consolidated by the practice of justice, as well as to develop human capacities according to the composition of different fields of expertise and the application of safe methods for the management of the institution.

Building capacities for investigation and disciplinary inspections through cooperation with international partners and agreements/memorandums of understanding/cooperation with international counterpart institutions and other national and international institutions.

As an institution of a country in the process of negotiating for EU membership, the High Inspector of Justice applies a very energetic approach and is always looking for good working

experiences from European colleagues and exchanges of best practices of inspection of justice and strengthening cooperation in the field of improving the administration of justice.

■ **Transparency:**

Despite the challenges encountered, related to infrastructure and lack of human resources, the HIJ has based its activity on public transparency. This is our pride. An efficient and well-designed website to provide maximum information regarding the complaints process and the activity of the office of the High Inspector of Justice. The reception of citizens, communication with audiovisual and written media and the timely responses of the coordinator for the right to information are systematic work dynamics in function of the transparency of the institution.

■ **Legal education:**

Legal education is a systematic work practice of the Office of the High Inspector of Justice. Getting to know the role and functions of the institution and explaining the work processes at the HIJ is part of the information meetings that are held with various social groups, from pupils and students to civil society organizations, etc. The reception of pupils, students, etc. at the institution is carried out in parallel with meetings outside the institution, to present the HIJ to various interest groups, even where they live, outside the capital. The High Inspector of Justice, magistrate and non-magistrate inspectors and heads and employees of various sectors in the HIJ, engage in such meetings where they discuss how the role of the institution is seen, experiences and expectations in relation to the behavior of magistrates in the system. This direct communication from all HIJ staff helps to increase transparency, but also the efficiency of the work of the institution and further in increasing and strengthening public trust in the justice system. Our official

website <https://ild.al/sq/kreu/> provides complete information about the work and functioning of the HIJ and is bilingual, in Albanian and English language.

Since 19 October 2023, the High Inspector of Justice is a member of the European Network of Justice Inspection Services (RESIJ), which consists of Belgium, Bulgaria, France, Italy, Spain, Portugal and Romania. HIJ started its cooperation with RESIJ in December 2021, at the initiative of Romania and with the support of France, initially being admitted to this Network with the status of an observer country. Since December 2021, HIJ has been actively engaged in every RESIJ activity, both in the Member States and outside the Union.

RESIJ, the European Network of Justice Inspection Services, was created in Paris, in March 2017, as an initiative of France, in the presence of representatives of the European Union and the European Commission for the Efficiency of Justice of the Council of Europe (CEPEJ). The aim was to find ways in which national judicial inspection services could contribute more actively to the uniform development of the European judicial area established by the Treaty of Amsterdam to the Treaty of Rome. Under the Albanian model, RESIJ has also been opened to other non-EU countries that are advanced in the process of accession negotiations.

The High Inspector of Justice has also established contacts with counterparts at the bilateral level, starting from the region, Kosovo, North Macedonia and Montenegro, in Europe and beyond, Greece, France, Spain, Italy, Romania, Bulgaria, the Kingdom of the Netherlands, the United Kingdom, USA, etc.

Justice institutions from the region came together in Tirana on 25 and 26 September 2025 for the conference “Justice Inspection Services and Integration Challenges”, to exchange experiences, address challenges related to judicial integrity and discuss their role in the European Union integration process. The conference was organized as a cooperation between the Office of the High Inspector of Justice and the OSCE Presence in Tirana, as well as the OSCE Missions in Belgrade, Podgorica, Pristina, Sarajevo and Skopje. Over the two days of this conference, discussions focused on three major topics: the principles and functioning of inspection services, their role in protecting democratic standards and promoting integrity, and the contribution of these institutions in the context of the EU integration process.
